The 5-Question Selection Test

Choosing the right digital product idea is crucial. Ask yourself these five questions to guide your decision:

1. **What problems can I solve for others?** (Focus on pain points and needs.)
2. **What am I genuinely knowledgeable or passionate about?** (Leverage your existing expertise and interests.)
3. **What skills do I possess that others would pay for?** (Identify your unique talents.)
4. **What kind of digital product aligns with my lifestyle and resources?** (Consider time commitment and technical requirements.)
5. **Is there a demonstrable market demand for this product?** (Do a quick search for similar offerings and customer interest.)

Score yourself on each question (e.g., 1-5, where 5 is high). The ideas that score highest across most questions are likely your best candidates.

Your 7-Day Step-by-Step Action Plan

Don't get overwhelmed! Here's a simple plan to get your first digital product off the ground:

- **Day 1: Ideation & Validation:** Use the 5-question test. Research your top 1-2 ideas. Check competitor offerings and audience interest.
- **Day 2: Outline Your Product:** Create a detailed outline or structure for your chosen product (e.g., chapter titles for an e-book, modules for a course).
- **Day 3: Content Creation (Phase 1):** Start creating the core content. Focus on delivering value. If it's an e-book, write the first few chapters. If it's a template, build the basic structure.
- **Day 4: Content Creation (Phase 2):** Continue creating content. Refine and edit existing work. Ensure clarity and accuracy.
- **Day 5: Design & Formatting:** Focus on the visual appeal. Design your cover, format your e-book/PDF, or polish your templates. Use tools like Canva.
- **Day 6: Setup & Platform:** Choose where to sell your product (e.g., Gumroad, Etsy, your own website). Set up your product listing, including descriptions and pricing.
- **Day 7: Launch & Promotion:** Announce your product to your audience (email list, social media). Start your initial marketing efforts.

The Simple Digital Product Funnel

A basic funnel guides potential customers from awareness to purchase:

1. **Awareness:** People discover your product through social media, blog posts, ads, or word-of-mouth.
2. **Interest:** They visit your product page or website and learn more about what you offer.
3. **Decision:** They consider the benefits, read testimonials, and compare options. Often, a lead magnet (free valuable content) can help here, encouraging sign-ups.
4. **Action:** They purchase your digital product.

Key Elements:

- **Compelling Product Page:** Clear description, benefits, visuals, and social proof.

- **Clear Call to Action (CTA):** Make it easy to buy.
- **Streamlined Checkout Process:** Minimize friction.
- **(Optional) Lead Magnet:** Offer a freebie (checklist, mini-guide) to capture email addresses for follow-up marketing.

Digital Product Launch Checklist
